PETHON 2000

PETHON 2000 copes with difficult drum movement problems.

Now is your chance to improve efficiency.

PETHON 2000 fully automatic drum handling equipment is one of most perfect ways for transporting and storing drums.

With PETHON 2000 any fork-lift truck can be converted for drum handling within seconds.

Your fork-lift truck can be used again for other jobs just as quickly.

Manual handling is no longer necessary, which means optimum protection for both drums and contents. And it helps prevent accidents.

Drum storage is more efficient than ever before. Compared with conventional storage with drums lying horizontally you can save over 30% space when drums are stored upright.

You can achieve an effective saving in labour costs. With drum handling equipment all you need is the truckdriver. More than 40% saving despite investment.

You need no pallets for storing drums.

You can handle most types of drums.

PETHON 2000 is exactly what you need for handling drums, even when they have to be transported horizontally.

PETHON 2000 Perfect technology.

The many outstanding design features of PETHON 2000 are the result of longstanding practical experience.

PETHON 2000 works fully mechanical

PETHON 2000 works more economical than mechanical clamping devices (eliminates space between drums).

PETHON 2000 means 75% less capital investment than is required for a hydraulic device.

PETHON 2000 operates reliably because it is specially adapted to the dimensions of the forks on your fork-lift truck.

PETHON 2000 operates with a built-in double safety-lock. Drums stay put even under the worst road conditions.

PETHON 2000 can be readily used for continuous duty: it is fully galvanized and hence corrosion-resistant.

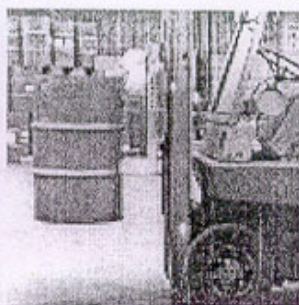

PETHON 2000 works with special grippers made of heat-treated steel for extreme durability, hence long service life.

PETHON 2000 EX meets maximum safety requirements: No sparks are produced during operation.

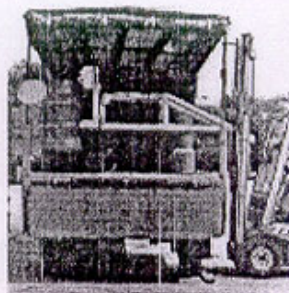

PETHON 2000 works with utmost precision.

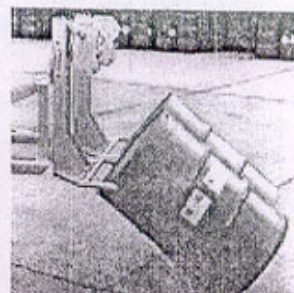

One drum, two drums and even five drums at a time P2000 will come to grips with any solution

PETHON 2000 directly mounted on the carriage. Very effective in very confined spaces

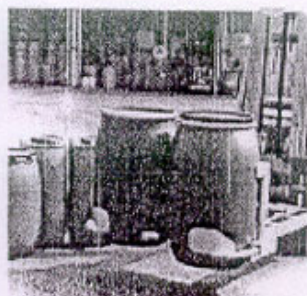

Loading lorries - a one man show. PETHON 2000 with a length of 1.8 meters for side-on loading.

PETHON 2000 is the ideal set-up device for drums with lateral bung holes.

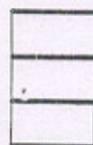

PETHON 2000 EX easy drum handling/transport. Manually operated drum grip with hydraulic lifting facility (for one drum)

Rimless plastic drums are no problem for PETHON 2000: Drum lifter one or two drums with a capacity of 125 and 250 litres.

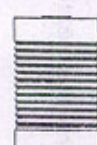

PETHON 2000 keeps a grip on every drum.

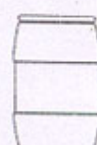

Metal Drum

Drum with removable lid and clamping ring

Asphalt drum

Fibre drum

Iron-hooped drum

Wide-necked drum

Large-bung drum

L-ring drum

We also manufacture :

- PETHON 2000 - a special pallet truck model with built-in counter weight.
- PETHON 2000 - a special model with stirring unit for the paint producing industry.
- PETHON 2000 - crane mount for any number of drums in conjunction with a lifting beam.
- PETHON 2000 - mechanical drum tipping and draining device.

- We can offer you the benefit of more than 10 years' experience in the manufacture of drum handling equipment.
- You can consult us at any time.
- Let us solve your drum handling problems for you.
